

NATIVITY SCENE NO. 1

The scene pictured above had been used for several seasons when photographed, and is still in usable condition. The manger pictured, which is not included with the set, should be constructed better than shown. This set is entirely constructed and painted by hand. Figures are flat, but the art work makes them seem alive at a distance of only a few feet. Completely weather-resistant throughout to last many years. Strongly constructed, not to be confused with cheap, poorly made scenes offered on the market. May be spaced over a large area, or grouped to fit in a smaller space. You can purchase as few individual figures as desired, or the entire set. Christ Child is not included and we suggest your using a doll for this. Manger may easily be constructed by anyone. **SUGGESTIONS:** It is effective to use small animals with this scene, such as sheep, calf tied around the manger. A record-player playing carols adds to the beauty, or a community singing when scene is unveiled. An aluminum foil star above the scene adds to the scene and spotlights are almost a necessity.

Roping decorated with artificial red berries \$1.50 red ruscus .....	1.00 Per Coil Additional		

All hand made by experienced workmen. Heavy weight, full, round, tightly woven with wire on heavy twine. Made up fresh just before shipment. Laurel, Mixed, and Hemlock Roping runs approximately 8" or more in diameter. Lycopodium and Princess Pine Roping average 4-6" diameter; extra heavy weight runs larger. Do not confuse our heavy weight roping with light, poorly made quality of the cheaper machine-made roping on the market.

**CARE OF ROPING:** Keep roping in a damp place after receiving, and never stack this deeply. Two ropes deep is all you should stack this. Do not keep in a warm place, or in direct sunlight before using, as this will make it dry out.

LAUREL ROPING

## EVERGREEN WREATHS

**HOW OUR WREATHS ARE MADE**—All our wreaths are hand made by workmen with years of experience. All are heavy, double face, on heavy steel hoops, bound with strong wire. All greens used are fresh and wreaths are made just before shipping to insure fresh material. Our wreaths usually average heavier and have more spread than stated.

**Stability of Wreaths**—Except for the Hemlock, none of the wreaths listed below will shed during the season. Hemlock keeps at least one month on cold storage or in cool damp place. After Hemlock is put up in warm room, it will last approximately 10 days; outside it will last longer.

**Type of Wreaths**—Hemlock and Balsam Wreaths are on flat style, while Laurel, Boxwood and White Pine Wreaths are round type, heavy, with good spread. Our Balsam is heavy, round and fluffy—not to be confused with the thin northern Balsam.

**Samples**—If you desire samples of any of our wreaths, please send check covering samples desired.

**Care of Wreaths**—When your order arrives, inspect them to see if they need smoothing out. Occasionally wreaths get roughed up in transit and smoothing them out gives you a wider spread. Keep all wreaths in a cool damp place until you use them. All wreaths may be dampened except White Pine. White Pine can be stored in a cool damp place, and even covered with a damp cloth, just as long as it is not too wet. Never stack wreaths too deeply when storing, as this causes heat and dries out the greens, especially the White Pine.

**Packaging of Wreaths**—All wreaths packed 12 per bundle except 35" and 24" sizes, which are packed 6 per bundle. Weights and measurements approximate. **No bundles will be broken.**
